Deborah Taylor Tate
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Deborah Taylor Tate:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Larry Miller

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet
-- but bad policies allow companies like AT&T and Verizon to
shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our
public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive
wholesale marketplace.
3. The freedom to access any content or services we want through
our devices.

These true open access standards should apply to the entire
wireless market.

Sincerely,

terry lee

The Federal Communications Commission

Dear The Federal Communications Commission:

Football is America's game. But cable companies across the country are denying access to millions of fans.

NFL Network carries some of the most popular programming on television. But some cable companies believe NFL fans will pay more to watch football, so they're holding us hostage by refusing to carry NFL Network in their broad cable packages. Instead, they're putting NFL Network on their premium "sports tier" and charging consumers up to \$10 extra per month to watch NFL games and related programming that are among the highest rated programs on television - games that should already be included in our cable package. Some cable companies are even refusing to carry the games and channel altogether.

Please stand up for football fans - tell Big Cable to listen to the fans and offer NFL Network affordably, just as the satellite companies are doing. Thank you.

Sincerely,

Stephen Smith

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It's in the public interest because it will make us safer and more competitive, it will create equal opportunity, and *it will improve our great country.*

Please support M2Z today.

Sincerely,

Sharon Hall
